

SAAB Automobile AB bankruptcy estate enthusiast car auction

The very last cars produced, models that never were put on the market and collectibles, sold on auction on behalf of the estate. General description in this document, detailed information and test results is on display on the auction house website: www.kvdauction.com

Important information about restrictions for the cars

There are four different categories of restrictions on the cars being sold. It is important for you as a buyer to carefully read the description of each car on www.kvdauctions.com and www.kvd.se. This shows exactly what applies for each car.

1 Registered vehicles ready for sale

The cars are approved and registered for use on the road in Sweden. The registration of these cars is transferred to the buyer on delivery and the car can be driven away.

2 New, unregistered vehicles in bonded warehouse

These cars are sold from a bonded warehouse. This means that it is only when the vehicle is taken out of the bonded warehouse that the customs declaration for import is made and the charges paid. The buyer is responsible for submitting the customs declaration and paying the charges. All the vehicles in bonded warehouse have a COC (certificate of conformity) available.

3 New, unregistered vehicles

A number of the cars are new, unregistered vehicles. This is because they are among the last cars made by Saab Automobile AB and never got as far as registration. Some of these vehicles have a COC (certificate of conformity) available, which makes registration possible, while others do not. The details of each of the new vehicles state whether a COC is available or not. Vehicles without COCs (including among others all the Saab 9-5 Sedans and Saab SportCombi 12 models) cannot be registered for the road. These vehicles are collector's items that are intended for car museums and private collections and must absolutely not be driven on the road.

4 Deregistered vehicles that have used test vehicle dispensation

Some of the cars being sold in the auction are deregistered vehicles that have made use of Saab's test car dispensation. These vehicles cannot be registered for use on the road. These vehicles are collector's items intended for car museums and private collections and must absolutely not be driven on the road.
